

# Program Support

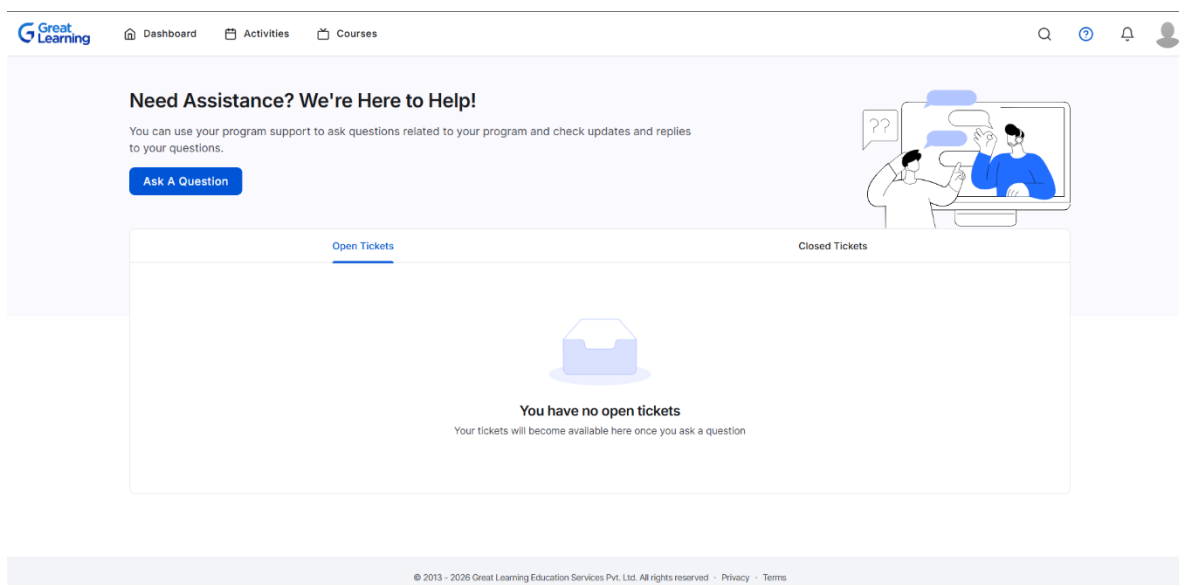

At Great Learning, we always strive to give learners the best learning experience. As a learner you may have a query, a question, or a concern, you may raise the same to us by the program support feature present on the Olympus.

Below are the basic instructions as to using this feature to raise a request to program support:

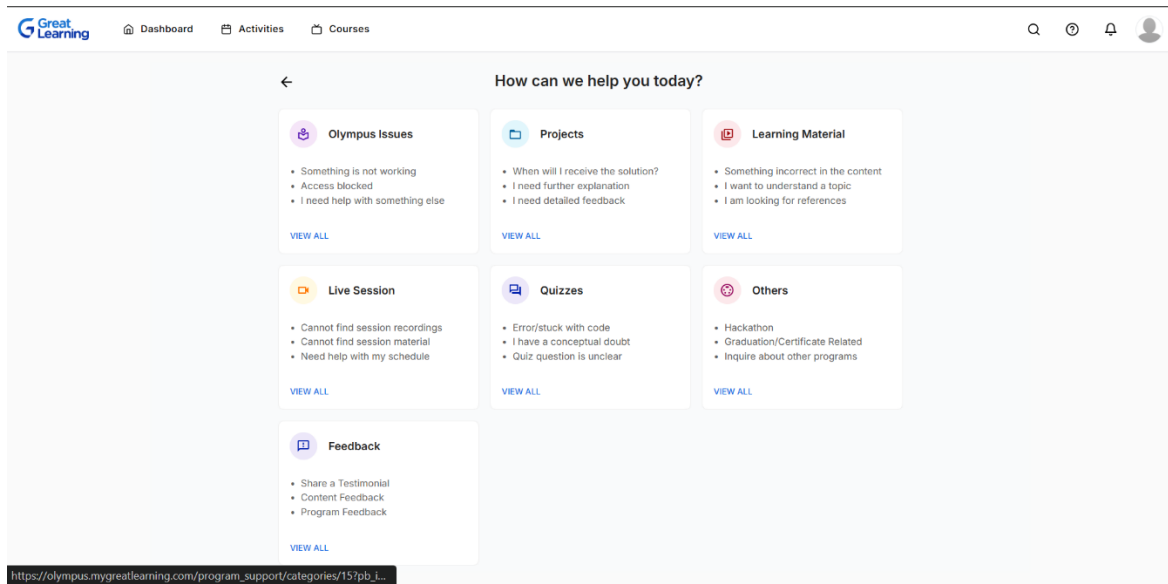

- Login on Olympus using your credentials
- On the student dashboard page, you can find the support feature on the top right-hand side (refer to below image - arrow with a red marker).

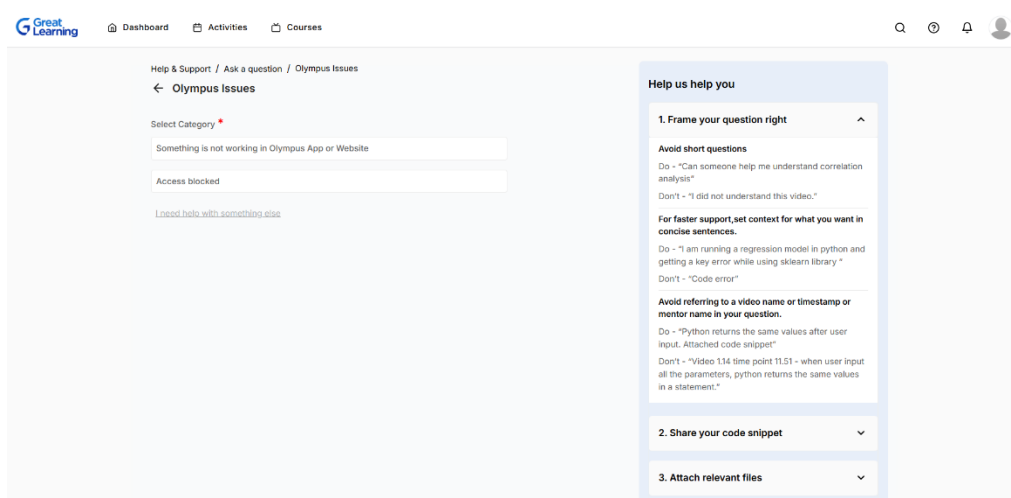

On the next screen you will find the like to raise a request to program office (refer the image in next page.) You need to click on **“Ask A Question”** to raise your Support Ticket.

You will get a prompt below to fill the required details such as category of the concern like Olympus issues, Projects, Learning Material, Live session etc.,

Mention the problem that you are facing with correct request & add error screenshot for better understanding, which will help in resolving your query promptly.

Help us help you

1. Frame your question right

**Avoid short questions**

Do - "Can someone help me understand correlation analysis"

Don't - "I did not understand this video."

**For faster support, set context for what you want in concise sentences.**

Do - "I am running a regression model in python and getting a key error while using sklearn library"

Don't - "Code error"

**Avoid referring to a video name or timestamp or mentor name in your question.**

Do - "Python returns the same values after user input. Attached code snippet"

Don't - "Video 1:14 time point 11:51 - when user input all the parameters, python returns the same values in a statement."

2. Share your code snippet

3. Attach relevant files

Once submitted, you can track the ticket status under Open Tickets in the Help & Support section.

Note:

1. Your request will get acknowledged with an automated email as it gets raised to the program office and will get resolved within 24 to 48 hours.
2. Any request raised on Sunday's or holidays shall take additional time to get resolved.
